Erro "Invalid registry ownership"

Olá,

Estou tentando realizar o irisstart, irisstop e irisforce e sempre me retorna o erro "Invalid registry ownership".

```
[root@svlxcin03 iris]# ls
bin      devuser  fop      IRIS-2020.1.1.408.0-lnxrhx64  iris.key  LastGood_.cpf  LICENSE  ODBCinstall  SNMP
csp     dist     httpd    iris.cpf      irisstart lgpl.txt      mcj      parameters.isc
dev     docs    install.cpf  irisforce    irisstop  lib           NOTICE  patrol
```

```
[root@svlxcin03 iris]# ./irisstart
Invalid registry ownership.
[root@svlxcin03 iris]# ./irisstop
Invalid registry ownership
[root@svlxcin03 iris]# ./irisforce
Invalid registry ownership
```

Alguém já passou por isso antes e pode me ajudar?
